

GG250

Capping machine to close jars and/or bottles with metal caps. **Max speed 30.000 cph**

TECHNICAL DATA

Cap range: Ø 27 ÷ 110mm - H. 5 ÷ 19mm

Jar range Ø 30 ÷ 160mm - H. 50 ÷ 260mm

Motorisation 3.25 kW

Steam consumption 100 kg/h at 3 bar

Air consumption 5 NI - 6 bar pressure

Water at 2 bar 8-10f°: 20 lt/h

Dimensions LxWxH (mm): 4000x1000 x2400

Machine suitable to close Regular, Medium, Deep Twist-Off, Pry-Twist, Pry-Off caps.

CHARACTERISTICS

Capping operation executed in a saturated steam chamber with high vacuum in the container

Constant vacuum value

Easy format change-over adjustments, no use of special change parts, even with the machine in operation

Constant screwing strength in any working conditions

Quick format change-over operations

High resistance to corrosion

Easy cleaning and maintenance
